Position:	Energy Sector Specialist
Period of Performance:	One-year full time contract - renewable

Responsibilities:

1. Integrate the Government of Jordan priorities and policies in the design and implementation of energy sector projects.
2. Provide studies, information and analyses towards the development of policy and strategies for the energy sector in consultation with relevant government agencies.
3. Provide policy advice on advancing policy and institutional reform implementation in the energy sector and on the optimal design and sequencing necessary improvements in the legal framework and institutional strengthening.
4. Assist in analyzing the technical, legal, financial, economic and regulatory aspects of the energy sector projects.
5. Assist in the preparation and review of capital investment and cost estimate of the energy sector projects, data and projections, and other relevant aspects.
6. Collate and update a library of relevant information and research on the energy sector.
7. Assist in conducting the initial high-level assessment of potential projects in the energy sector from a technical perspective.
8. Lead and identify opportunities for technical assistance projects in the energy sector.
9. Prepare policy papers, discussion notes on issues arising, for consideration by government and other stakeholders.
10. Support the establishment of monitoring frameworks and provide ongoing feedback and technical backstopping and regularly monitor progress towards the identified indicators.
11. Provision of strategic guidance and substantive technical inputs with regard to the energy sector policy dialogue and ensure well-functioning of the policy dialogue framework.
12. Systematically ensure that relevant experiences and lessons learnt elsewhere in the region or world-wide inform the implementation of energy sector policy agenda in Jordan and extract learning and document lessons learnt from the experiences in Jordan to articulate them with the regional and global body of knowledge.
13. Plan and carry out capacity gaps assessment and ensure the design and delivery of focused response programs to enhance the capacity of the energy sector at policy level.
14. Coordinate with the relevant donors, national agencies, international agencies on issues pertaining to the planning and development of the energy sector.
15. Advise senior management as well as appropriate energy sector counterparts on all matters related to development, providing strategic guidance, technical support and coordinating related initiatives in interrelated sectors.
16. Assist in conducting assessment, planning, formulation, execution, monitoring and evaluation of projects involved in the energy sector, ensuring that all operations meet established international standards.

**Qualifications:****Professional Skills**
