Ministry of Planning and International Cooperation Enhanced Productivity Program

Enhanced Productivity Program (EPP)

Introduction

EPP was Launched in 2002, it aims to improve economic and living standards for Jordanians, especially in less developing areas, through increasing productivity and participation to achieve sustainable local development and implementing a set of comprehensive components. EPP is supervised by MoPIC through the enhanced Productivity program, that set and design programs, track implementation and coordination among all partners and implementing entities. EPP programs/projects are implemented through Government and Non-Governmental Organizations, as well as Private Sector.

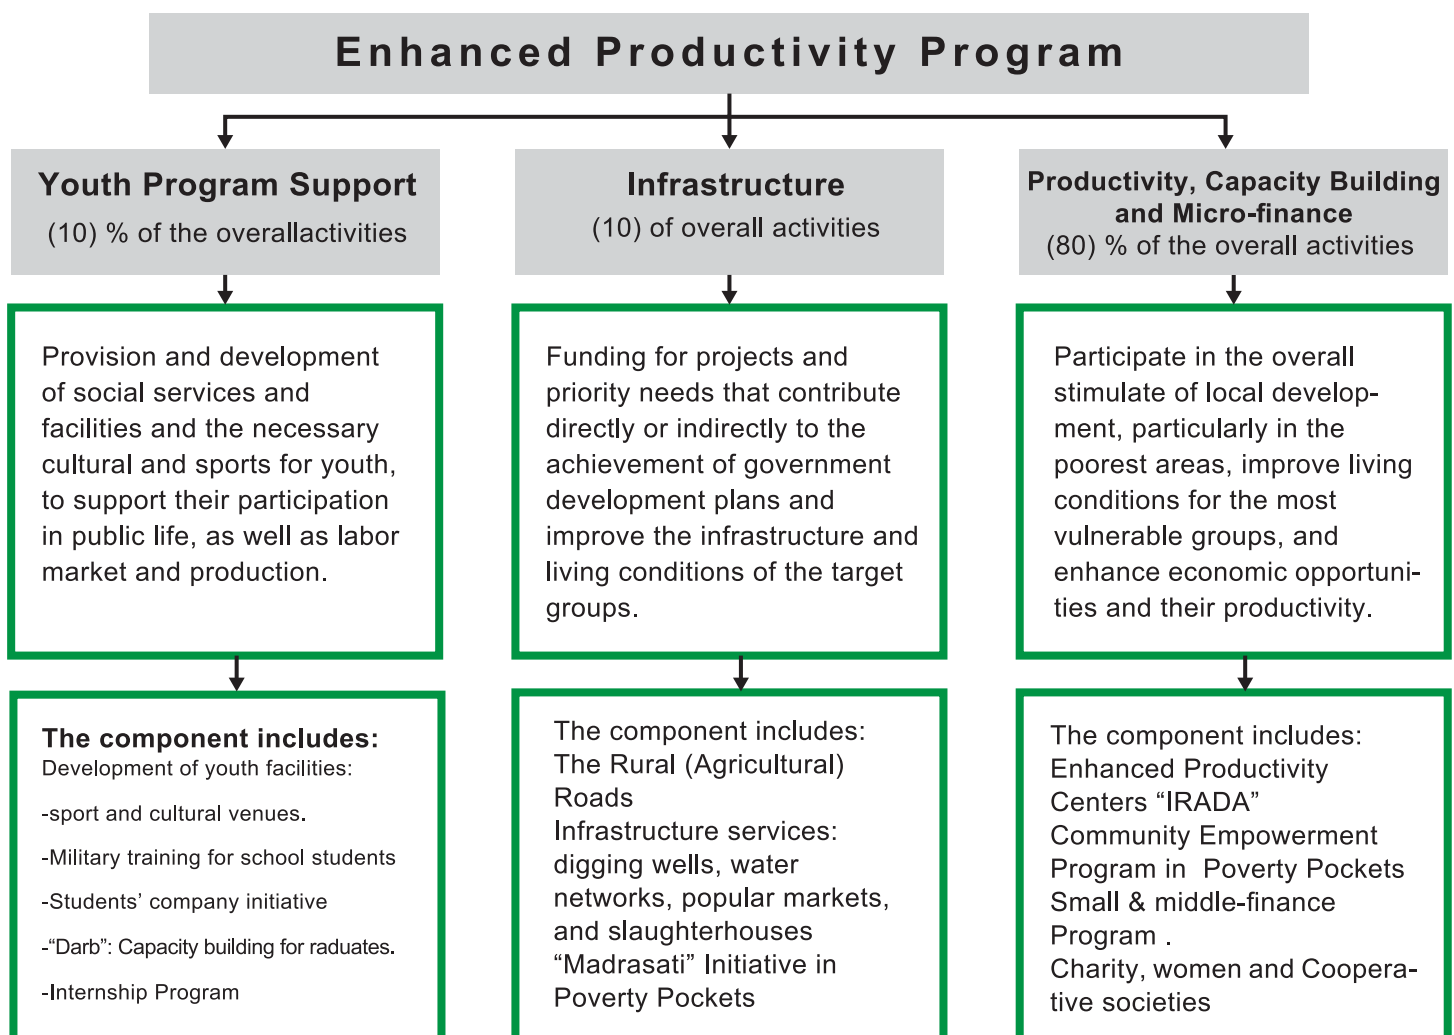

Vision

Create a sustainable productivity through participation of the local communities in the development process to Alleviate the poverty & Unemployment, by maximize results, impacts, productivity & sustainable enterprise development.

Goal

Enhance the economic development of rural & poor areas throughout the kingdom, improve community infrastructure and create an investment environment to enhance the productivity.

Main Components:

Scope of Work:

Execution of the above mentioned projects in cooperation with partners (Gov., NGOs, Private sectors, etc.)

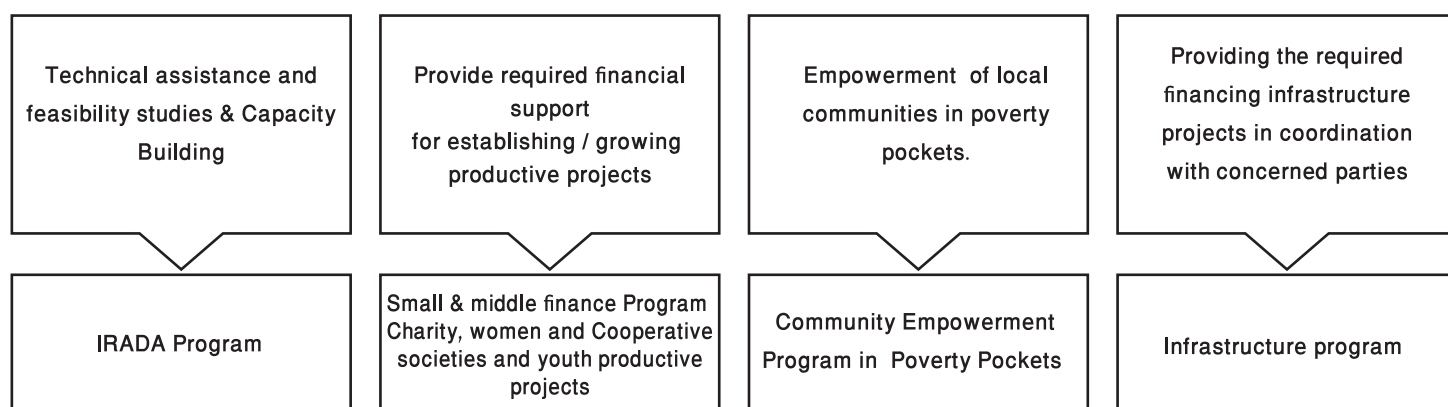

Management structure

The program is managed by the director, and main coordinators who supervise the implementation process of the activities.

Allocation mechanism

The allocation of funding for projects of the EPP program comes through the Allocation Committee joint program, which includes in its membership the representatives of the EPP program and representatives from: the Ministry of Finance, the Audit Bureau, the General Budget Department, where the program staff, after studying the project and the completion of the elements of success and evidence of the economic feasibility of implementing, submits a proposal to the Committee of allocation to take the appropriate decision on funding, and to be signed by the Minister of Planning and International Cooperation.

The Foundations of the Work Program (EPP):

Adopt the philosophy of empowerment and capacity building for all target groups, and therefore components of the program are designed to target capacity building of individuals and community groups, especially in poverty pockets, to enable them to set up their business productivity, and provide access to the necessary financing. In general, the basic pillars that make up the general framework that governs and designs and implementation of activities and projects of the program are as follows:

- Emphasis on building the capacity of local partners in the development of civil organizations and increase their contribution to the implementation of development projects.
- Reduce the program's contribution to the implementation of projects and activities that fall within the direct responsibilities and tasks of the ministries and government agencies concerned.
- Promote a sense of ownership among the beneficiaries of projects, through its contribution in financing the projects in various stages of implementation.
- Continue to implement activities and projects aimed at the poorest.
- Ongoing review of the criteria for selection of projects, both in determining what areas the beneficiary or the beneficiary agencies.
- Support the building of partnerships and giving priority to projects carried out under that, especially for non-governmental organizations.
- Entrenching a culture of excellence in the good performance of the local bodies and provides incentives to do so.
- Encourage self-employment and leadership among young people.
